  Services: Selected abortion services
  Select Printer and Press Submit button.

Purpose	To review IPPF Statistics Report generator
Process description	OpenEMR statistics reporting module is a report generator based on a parameter set that defines content, rows and columns within a specified date range. In addition, Filters are provided to select control variables such as sex, clinic, service type, specific services, age range, sorting criterion and periods (month, quarter, year ad totals in range period).
Pre-conditions	Client data has been entered and data quality verified.
Observations	In addition to being displayed onscreen, statistical reports can be exported to comma-separated value (CSV) format readable with Excel, and to PDF to be stored digitally or printed in paper
